SPECIALIZED DISCLOSURE REPORT

MICROCHIP TECHNOLOGY INCORPORATED

(Exact Name of Registrant as Specified in Its Charter)

Delaware

(State or Other Jurisdiction of Incorporation or
Organization)

001-42569

(Commission File No.)

86-0629024

(IRS Employer Identification No.)

2355 West Chandler Boulevard, Chandler, Arizona 85224-6199

(Address of Principal Executive Offices, Including Zip Code)

J. Eric Bjornholt, Senior Corporate Vice President, Chief Financial Officer (480) 792-7200

(Name and telephone number, including area code, of the person to contact in connection with this report)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2025.

Section 1 – Conflict Minerals Disclosures

Item 1.01 and 1.02 Conflict Minerals Disclosure and Report, Exhibit

Microchip Technology Incorporated's ("Microchip's") Conflict Minerals Report for the reporting period January 1, 2025, through December 31, 2025, is provided as Exhibit 1.01 hereto and is publicly available at <https://www.microchip.com/en-us/about/corporate-responsibility/our-supply-chain>. Microchip's product descriptions, disclosure of countries of origin, statements regarding recycled and scrap sources, and determinations and related disclosures are included in Microchip's Conflict Minerals Report and are incorporated by reference in this Section.

Section 2 – Exhibits

Item 2.01 Exhibits

1.01 [Conflict Minerals Report for the reporting period January 1, 2025, through December 31, 2025](#)

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

May 27, 2026

Microchip Technology Incorporated

By: /s/ J. Eric Bjornholt

J. Eric Bjornholt
Senior Corporate Vice President and
Chief Financial Officer
(Principal Financial and Accounting Officer)

CONFLICT MINERALS REPORT

MICROCHIP TECHNOLOGY INCORPORATED

In Accord with Rule 13p-1 Under the Securities Exchange Act of 1934

This report for the year ended December 31, 2025, is presented to comply with Rule 13p-1 under the Securities Exchange Act of 1934 ("Rule 13p-1"). Rule 13p-1 was adopted by the United States Securities and Exchange Commission ("SEC") to implement reporting and disclosure requirements related to conflict minerals as directed by Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 ("Dodd-Frank"). Rule 13p-1 imposes certain reporting obligations on SEC registrants whose products contain conflict minerals necessary to the functionality or production of their products. Conflict Minerals are defined by Rule 13p-1 as gold, cassiterite, columbite-tantalite, wolframite, and their derivatives, which are limited to tin, tantalum, and tungsten.

If a registrant has reason to believe that any conflict minerals in their supply chain may have originated in the Democratic Republic of the Congo ("DRC") or an adjoining country ("Covered Countries"), or if they are unable to determine the country of origin of conflict minerals or that their products are manufactured entirely from recycled and scrap sources, then the issuer must exercise due diligence on the source and chain of custody of the conflict minerals. The registrant must annually submit a Conflict Minerals Report ("CMR") to the SEC that includes a description of those due diligence measures. This report is Microchip Technology Incorporated's CMR for the reporting calendar year ended December 31, 2025.

This report is not audited, as Rule 13p-1 and current SEC guidance provide that if the registrant is not declaring products as "DRC Conflict Free," the CMR is not subject to an independent private sector audit ("IPSA").

1. COMPANY OVERVIEW

MICROCHIP TECHNOLOGY INCORPORATED develops, manufactures, contracts to manufacture and sells specialized semiconductor products used by its customers in a wide variety of embedded control applications. Microchip Technology Incorporated was incorporated in Delaware in 1989. In this CMR, "we," "us," and "our" each refers to Microchip Technology Incorporated and its subsidiaries ("Microchip"). Our executive offices are located at 2355 West Chandler Boulevard, Chandler, Arizona 85224-6199 and our telephone number is (480) 792-7200.

Our Internet address is www.microchip.com. This CMR will be posted on our website with other SEC filings under About/Investor Relations as soon as reasonably practicable after it is electronically filed with the SEC. All of our SEC filings are available on our website free of charge. Additionally, this CMR will be posted on our designated Responsible Minerals Sourcing webpage at the internet address <https://www.microchip.com/en-us/about/corporate-responsibility/our-supply-chain>.

The information on our website is **not** incorporated into this CMR.

1.1 Microchip Products

Microchip is a leading provider of smart, connected and secure embedded control solutions. Its easy-to-use development tools and comprehensive product portfolio enable customers to create optimal designs, which reduce risk while lowering total system cost and time to market. The company's solutions serve approximately 101,000 customers across the automotive, aerospace and defense, communications, consumer appliances, data centers and computing, and industrial markets. Headquartered in Chandler, Arizona, Microchip offers outstanding technical support along with dependable delivery and quality.

A more detailed discussion of our product categories and the products relating to each category for calendar year 2025 are contained in our Annual Reports and SEC filings available on: <https://ir.microchip.com/sec-filings>.

For the purposes of this report, Microchip's products are further delineated in the table below separating integrated circuits from all other types of products.

All references to Microchip products hereafter include Microchip and all subsidiaries' products in Categories A and B that were manufactured by Microchip or its subsidiaries, or contracted by Microchip or its subsidiaries to be manufactured, and within the scope of Rule 13p-1 ("Microchip products") unless specifically attributed to Microchip or a specific subsidiary (e.g. "Microchip Category A products" vs. "subsidiary Category A products").

Conflict Minerals Disclosure Category	Conflict Minerals Product Description
A	Integrated circuits and embedded control solutions (e.g., PIC® microcontrollers, microprocessors, dsPIC® digital signal controllers, touch screen controller ICs, touch and gesture sensing solutions, analog and interface, RF front-end products, wireless audio, USB and wireless solutions, embedded security products, memory products, medical electronics, LED drivers, printer/EL drivers, telecommunications, general industrial), field programmable gate arrays ("FPGAs"), Application-Specific Integrated Circuits ("ASICs"), Power-over-Ethernet ICs and legacy discrete components
B	RF modules and touch screen controller boards
	System-in-Package (SiP) hybrid modules
	System on chip solutions ("SoCs"), Power management products, timing and synchronization devices and precise time solutions, voice processing devices, radio frequency ("RF") solutions, discrete components contained in peripheral equipment, enterprise storage and communication solution products, midspans, security technologies and scalable anti-tamper products, Ethernet solutions, as well as custom design capabilities and services
	R&D application development printed circuit boards and system kits

During the analysis of Microchip products it was found that small quantities of tin, tantalum, tungsten and/or gold ("3TG"), necessary to their functionality or production, are found in substantially all Microchip products (Categories A and B).

1.2 Conflict Minerals Report

For all product categories, Microchip has been unable to conclusively determine the origin of the 3TG that its products contain, or to conclusively determine to what extent they come from recycled or scrap sources, the facilities used to process them, their country of origin, or their mine or location of origin. Microchip’s suppliers reported at broad levels, often at the company or large product family level. None of Microchip's suppliers identified which of their suppliers sourced Microchip products, and none of our suppliers reported that all entities that they identified on their Responsible Minerals Initiative Conflict Minerals Reporting Template ("RMI CMRT") sourced any portion of Microchip products. This report describes Microchip’s Reasonable Country of Origin Inquiry ("RCOI") for context, the due diligence measures taken on the 3TG source and chain of custody, a description of the products manufactured or contracted to be manufactured for which Microchip controlled the design and specified or approved the utilized materials, as well as the results of its due diligence efforts, and expected risk assessment and mitigation steps.

1.3 Conflict Minerals Policy

Microchip has a conflict minerals policy. Our policy is available on our company website at <https://www.microchip.com/en-us/about/corporate-responsibility/our-supply-chain>.

2. MICROCHIP’S REASONABLE COUNTRY OF ORIGIN INQUIRY (RCOI) RESULTS

Since 2020, Microchip has been contracting with an industry leading third-party provider to help in conducting our annual RCOIs for our supply chains.

2.1 Category A Products

For Category A products, beginning in January 2025, Microchip sent requests with a set of instructional documents to its well-defined raw material suppliers and contract manufacturers, requesting completion of the RMI CMRT.

The responses were reviewed against developed criteria to determine valid answers and to identify candidates for subsequent inquiry ("Response Criteria"). For Microchip Category A inquiries, responses were received from all first-tier suppliers. Most responses were considered valid in first submission, while some required subsequent inquiries.

TABLE 1
Category A Products, Smelter Metrics - 206¹ Total Smelters

Metal	Smelters recognized by the RMI RMAP to be Conformant with their responsible minerals sourcing protocols	Smelters actively participating in sourcing audits by RMI RMAP, TI-CMC, LBMA, or similar	Smelters that use 100% scrap or recycled sources	Smelters known to source from the Covered Countries or for which there is reason to believe may source from the Covered Countries
Tantalum	32 of 33	1 of 33	3 of 33	14 of 33
Tin	49 of 50	1 of 50	14 of 50	7 of 50
Tungsten	31 of 31	0 of 31	8 of 31	6 of 31
Gold	92 of 92	0 of 92	35 of 92	5 of 92

All smelters for Category A products known to source from the Covered Countries, or for which there is reason to believe may source from the Covered Countries, are recognized as Conformant with RMI Responsible Minerals Assurance Process (RMAP) protocols and are listed on the RMI's "Conformant" smelter list.

¹The total number of reported smelters represents verified legitimate smelters or refiners of 3TGs, that have been reported by at least one of our suppliers in our 2025 RCOI. Data is provided by our third-party due diligence consultants.

2.2 Category B Products

Microchip started the RCOI for Category B products in July 2025. Having previously identified and queried the printed circuit board manufacturers and the subcontract manufacturers' unique materials, it successfully expanded its inquiry of discrete component manufacturers for all categories and manufacturers of peripheral equipment.

TABLE 2
Category B Products, Smelter Metrics - 332² Total Smelters

Metal	Smelters recognized by the RMI RMAP to be Conformant with their responsible minerals sourcing protocols	Smelters actively participating in sourcing audits by RMI RMAP, TI-CMC, LBMA, or similar	Smelters not actively participating in sourcing audits by RMI RMAP, TI-CMC, LBMA, or similar	Smelters that use 100% scrap or recycled sources	Smelters known to source from the Covered Countries or for which there is reason to believe may source from the Covered Countries
Tantalum	32 of 35	1 of 35	2 of 35	3 of 35	14 of 35
Tin	50 of 70	2 of 70	18 of 70	18 of 70	8 of 70
Tungsten	32 of 50	1 of 50	17 of 50	12 of 50	6 of 50
Gold	92 of 177	2 of 177	83 of 177	57 of 177	19 of 177

Forty-seven smelters for Category B products are known to source from, or there is reason to believe they may be sourcing from, the Covered Countries. Thirty-two of these smelters are recognized as Conformant with RMI Responsible Minerals Assurance Process (RMAP). The remaining fifteen smelters are not recognized as RMAP-Conformant, thus requiring additional due diligence. For more information on these smelters, please see section 3.3.1 titled "Category B Identified Risks."

3. MICROCHIP'S DUE DILIGENCE PROCESS

3.1 Design of Due Diligence

Microchip made a good faith effort in the reporting year to work within the framework of the Organization for Economic Co-Operation and Development's Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas: Third Edition, OECD Publishing ("OECD Guidance") and related Supplements for 3TG, as it relates to its position in the supply chain as a "downstream company."

²The total number of reported smelters represents verified legitimate smelters or refiners of 3TGs that have been reported by at least one of our suppliers in our 2025 RCOI. Data is provided by our third-party due diligence consultants.

3.2 OECD Step 1: Strong Company Management Systems

Microchip operates under a set of Guiding Values and a Code of Business Conduct & Ethics that form the foundation of all management systems at Microchip. Our Guiding Values and Code of Business Conduct & Ethics can be found on our website: <https://www.microchip.com/en-us/about/corporate-responsibility/our-company>. Continuing through the reporting year, Microchip expressed its concern and commitment regarding conflict minerals sourcing from the DRC and Covered Countries in a publicly available policy statement on conflict minerals as outlined in Section 1.3.

In addition, Microchip communicates our concern and commitment regarding conflict minerals sourcing from the DRC and Covered Countries in our Terms and Conditions of Purchase that accompany every order acknowledgement.

3.2.1 Internal Team

Continuing through the reporting year, Microchip's management system for conflict minerals included a team of corporate representatives from relevant functions, including Corporate Responsibility, Legal, Manufacturing, Product Material Compliance, and Supply Management. The team is sponsored by Microchip's Sr. Corporate VP of Backend Operations, and senior management was briefed about the results of due diligence efforts, including minerals sourcing risks.

The conflict minerals team is responsible for implementing the conflict minerals compliance strategy, including formalizing conflict minerals due diligence practices and monthly reporting, developing supplier risk assessment criteria and responses to risk. The team is led by the Associate Director, Corporate Responsibility, who acts as the conflict minerals program manager.

3.2.2 Supply Chain Control Systems

To encourage the establishment of a system of controls and transparency over the mineral supply, Microchip participates in the Responsible Minerals Initiative ("RMI"). Participation allows Microchip to promote validation programs (such as the RMAP or standards enacted by the London Bullion Market Association ("LBMA") or the Responsible Jewellery Council ("RJC")), increase our knowledge of smelters and refiners in the supply chain, understand the scope and process for audit and validation program plans for metal-specific trade organizations, gain insight into which smelters are known to source from the covered countries, and join discussions of emerging practical due diligence experiences. During the reporting year, Microchip engaged two third-party due diligence consultants experienced with smelter sourcing research

and with proven records of smelter engagement. The consultants reviewed smelter data obtained from Microchip's 2025 RCOI for Category A products and raw, unsorted smelter data from 2025 RCOI for Category B products, and then prepared a technical file for each. Mineral sourcing risk, including customer perception of sourcing risk, was presented to Microchip's senior management.

3.2.3 Microchip Supplier Engagement

In Calendar Year 2025, Microchip engaged an industry-leading third-party provider to help conduct our supplier engagement. This engagement included training and educational materials and supplier support. Microchip and the third-party provider reviewed responses against criteria designed to determine the number of valid responses ("Response Criteria") and followed up with corrections and clarifications as needed.

Microchip's supplier engagement activities in the reporting year focused primarily on Category A suppliers. During the reporting year, Microchip requested completion of the RMI CMRT by raw material suppliers and subcontract manufacturers of Category A products and ultimately received a 100% response rate from those said suppliers.

For Microchip's Category B products, Microchip continued its engagement with the second and third-tier discrete component and peripheral equipment suppliers using the RMI CMRT and educational materials, but continued to encounter circumstances where some manufacturers of the discrete components declined to provide a completed CMRT due to the indirect nature of Microchip's relationship with such suppliers (Microchip's contract manufacturers are discrete component suppliers' direct customers and are therefore not responsible for sharing details regarding the discrete components). Microchip has begun to work more closely with its contract manufacturers to bridge this gap, however, hurdles still exist with the discrete component suppliers. During the reporting year, Microchip received a >82% response rate from suppliers for Category B products, up from >79% in 2024.

3.2.4 Grievance Mechanism

Microchip provides grievance mechanisms so that employees, suppliers, and others can report suspected non-compliance with legal requirements and suspected non-compliance with Microchip's Code of Business Conduct & Ethics.

Our Code of Business Conduct & Ethics policy (MCHP-690), Compliance with Laws policy (MCHP-685) and Reporting Legal Non-Compliance policy (MCHP-675) include complaint procedures. These policies are publicly available at <https://www.microchip.com/en-us/about/corporate-responsibility/our-company>.

For conflict minerals related grievances, Microchip employees and external parties may also submit concerns or information to ConflictMinerals@Microchip.com.

3.2.5 Maintain Records

Microchip has developed a process for collecting and retaining RCOI and due diligence documentation that was directed, controlled, and archived by the conflict minerals team.

3.3 OECD Step 2: Identification and Assessment of Risk in the Supply Chain

Because of Microchip's size, the complexity of its products, and the depth, breadth, and evolution of its supply chain, it may be challenging to identify suppliers upstream from its first tier (direct) suppliers. Accordingly, Microchip identifies direct suppliers which may contain conflict minerals and pursues smelter identification using the RMI CMRT. Additionally, Microchip leverages its membership in the RMI as an integral part of its supply chain identification and due diligence and risk assessment process. Furthermore, Microchip uses its third-party due diligence consultants to gain insight into Smelters' or Refiners' (SORs') sourcing practices, and their internal due diligence procedures to help with risk assessment.

3.3.1 Category B Identified Risks

The following smelters may pose a risk due to sourcing (or we have reason to believe they may be sourcing) from the Covered Countries and not being RMAP-Conformant:

African Gold Refinery (CID003185, Gold)
Al Etihad Gold Refinery DMCC (CID002560, Gold)
Albino Mountinho Lda. (CID002760, Gold)
Augmont Enterprises Private Limited (CID003461, Gold)
CGR Metalloys Pvt Ltd. (CID003382, Gold)
Dijllah Gold Refinery FZC (CID003348, Gold)
Emirates Gold DMCC (CID002561, Gold)
Fidelity Printers and Refiners Ltd. (CID002515, Gold)
Fujairah Gold FZC (CID002584, Gold)

Gasabo Gold Refinery Ltd (CID005006, Gold)
International Precious Metal Refiners (CID002562, Gold)
L'Orfebre S.A. (CID002762, Gold)
SAM Precious Metals FZ-LLC (CID003666, Gold)
Shirpur Gold Refinery Ltd. (CID002588, Gold)
Yunnan Chengfeng Non-ferrous Metals Co., Ltd. (CID002158, Tin)

The list of smelters that pose a risk of sourcing from a covered country and are not RMAP-Conformant has decreased from the previous year. This is due to the increase in response rate and the availability of improved smelter sourcing data. When it is discovered that a smelter or refiner presents a credible risk of irresponsible sourcing based upon our third-party due diligence research, Microchip will work with and educate its suppliers about the risks of having this type of smelter in its supply chain and, where feasible, begin the process of disengaging with the non-cooperating component manufacturers where mitigation appears not feasible or unacceptable.

We are reporting that there is risk that African Gold Refinery, CID003185, and JSC Uralelectromed, CID000929, may be in the supply chain of our Category B products. These are the only smelters from the above list that are listed on the OFAC Sanctions List. African Gold Refinery is reported by eighty-three suppliers, and JSC Uralelectromed is reported by eighty-five suppliers. Due to the indirect relationship that we have with any smelter or refiner (SOR), we are reliant on our third-party consultants to perform outreach and due diligence although in many instances further outreach may not be possible. We are also aware that the RCOI process provides many challenges and that, almost exclusively, our suppliers report smelters at a company level instead of a product level. This leads to over-reporting of 3TGs that may or may not be contained in our products.

The following smelters may pose a risk as they are Russian Federation smelters and are not RMAP-Conformant:

Hydrometallurg, JSC (CID002649, Tungsten)
JSC "Kirovgrad Hard Alloys Plant" (CID003408, Tungsten)
JSC Ekaterinburg Non-Ferrous Metal Processing Plant (CID000927, Gold)
JSC Novosibirsk Refinery (CID000493, Gold)
JSC Uralelectromed (CID000929, Gold)
Kyshtym Copper-Electrolytic Plant ZAO (CID002865, Gold)
Moliren Ltd. (CID002845, Tungsten)
Moscow Special Alloys Processing Plant (CID001204, Gold)

Novosibirsk Tin Combine (CID001305, Tin)
NPP Tyazhmetprom LLC (CID003416, Tungsten)
OJSC "The Gulidov Krasnoyarsk Non-Ferrous Metals Plant" (OJSC Krastsvetmet) (CID001326, Gold)
OOO "Technolom" 1 (CID003614, Tungsten)
OOO "Technolom" 2 (CID003612, Tungsten)
Prioksky Plant of Non-Ferrous Metals (CID001386, Gold)
SOE Shyolkovsky Factory of Secondary Precious Metals (CID001756, Gold)
Solikamsk Magnesium Works OAO (CID001769, Tantalum)
Unecha Refractory metals plant (CID002724, Tungsten)

There are ninety-eight suppliers that are reporting one or more of the above smelters. Due to the indirect relationship that we have with any smelter or refiner (SOR), we are reliant on our third-party consultants to perform outreach and due diligence although in many instances further outreach may not be possible. We are also aware that the RCOI process provides many challenges and that, almost exclusively, our suppliers report smelters at a company level instead of a product level. This leads to over-reporting of 3TGs that may or may not be contained in our products.

3.4 OECD Step 3: Strategy to Respond to Identified Risks

Microchip believes that understanding smelter sourcing practices is the best method to determine the conflict status of a product. To that end, Microchip is a member of the RMI and it reviews the lists of smelters reported by its supply chain against the RMI's RMAP "Conformant" smelter lists, the "Active" smelter lists, and the TI-CMC "Active" smelter list (TI-CMC Category A, Members Progressing Toward RMAP Validation). In addition, Microchip utilizes RMI-recognized third-party consultants to help identify risks throughout its supply chain. It also engages with suppliers who are believed to be supplying 3TG from sources that support conflict in the Covered Countries, with an end goal of establishing an acceptable alternative source of 3TG not supporting such conflict. Microchip also advises smelters within its supply chain to voluntarily participate in the RMI RMAP or similar sourcing audit programs in order to achieve a Conformant status under the organization's responsible minerals classification.

3.5 OECD Step 4: Carry Out Independent Third-Party Audit of Supply Chain Due Diligence at Identified Points in the Supply Chain

Microchip does not typically have a direct relationship with 3TG smelters and refiners and does not perform direct audits of these entities within its supply chain. Microchip does, however, leverage its third-party due diligence consultants to contact smelters and refiners with which it does not have direct relationships or which it does not have the ability to contact. Using its third-party due diligence consultants, Microchip gains insight into SORs'

sourcing practices and their internal due diligence procedures. Microchip's third-party due diligence consultants also encourage non-conformant/non-participating SORs to become conformant by joining the RMI or affiliated groups on Microchip's behalf. Additionally, Microchip utilizes and supports the due diligence conducted by programs like the RMI to conduct and coordinate third-party audits to validate 3TG processor sourcing practices.

3.6 OECD Step 5: Report Annual Supply Chain Due Diligence

Microchip's Due Diligence Review criteria includes a determination of the geographic location, whether there is a known, actively mined, and economically viable reserve of 3TG in the area, whether there is positive evidence of responsible and/or irresponsible sourcing, whether there is contrary evidence of responsible sourcing - all from publicly available sources, the smelters' websites, the UN Group of Experts, NGOs, the RMI and similar organizations, and from our due diligence consultant's communication with certain smelters. Please refer to Section 3.3 of this Conflict Minerals Report for the discussion on the steps taken on these eleven findings.

As a result of due diligence with suppliers and smelters through its third-party consultant teams, Microchip has determined that 100% of smelters in its Category A product supply chain are RMAP conformant as of the end of our RCOI.

Similarly, as a result of our due diligence with suppliers and smelters which are part of Microchip's Category B product supply chain as well as through working with third-party consultants, Microchip has determined that approximately 62% of its smelters are RMAP conformant, 2% are actively pursuing their conformant status, and 36% are currently not enrolled in a validation program. We received a larger response rate in our Category B RCOI cycle outreach, but the total number of reportable smelters has decreased slightly in comparison to last year due to the supply chain maturing.

Based on RCOI information provided by suppliers in Microchip's supply chains, its due diligence efforts, and due diligence provided by our third-party consultants, the SORs that may have processed the 3TG in Microchip's Category A products include those listed in Table 1. The SORs that may have processed the 3TG in Category B products include those listed in Table 2.

Based on its due diligence efforts, Microchip does not have sufficient information to conclusively determine the countries of origin for the 3TG in its products. Based on the information provided by Microchip's suppliers, our third-

party due diligence consultants, the RMI, and others, Microchip believes that the countries of origin for the 3TG in our products include the countries listed in Table 7 and Table 8.

While sixty smelters in Category A products were identified as exclusively using scrap or recycled sources of 3TG, it was determined that no correlation can be made to any specific Microchip Category A product type, technology family, or part number. No Microchip Category A product is made exclusively with 3TG solely sourced from scrap or recycled sources.

Additionally, although ninety smelters in Category B products were found to source from scrap or recycled sources of 3TG exclusively, it was determined that no correlation can be made to any specific Microchip Category B product types, technology family, or part number. No Category B product is made exclusively with 3TG solely sourced from scrap or recycled sources.

Microchip's independent due diligence produced information suggesting thirty-two reported smelters in Category A products either are known to source from the Covered Countries, or there is reason to believe they may or could source from the Covered Countries based upon business relationships. Each of these smelters is recognized by the RMI to be Conformant with the organization's responsible minerals sourcing protocols and are listed on the RMI RMAP "Conformant" smelter lists.

In Category B products, Microchip's independent due diligence produced information suggesting forty-seven reported smelters either as known to source from the Covered Countries or there is reason to believe they may source from the Covered Countries. Thirty-two of the smelters are recognized by the RMI to be "Conformant" with the organization's responsible minerals sourcing protocols and are listed on the RMI RMAP "Conformant" smelter lists. For the fifteen smelters reported to be in the supply chain for Category B products that were not recognized by the RMI as Conformant, additional due diligence included leveraging the RMI and our third-party consultants.

In addition to this CMR, Microchip communicates its conflict minerals activities in its annual Sustainability Report, its monthly due diligence report and in the conflict minerals sourcing policy, which are available on our company website: <https://www.microchip.com/en-us/about/corporate-responsibility>. The information on our website is not incorporated into this CMR.

3.6.1 Efforts to Determine Mine or Location of Origin

Microchip has established that participation in RMI, requesting its suppliers complete the RMI CMRT, and retaining third-party due diligence consultants in the reporting year are reasonable ways to determine the mines or countries of origin of the 3TG in its supply chain. Microchip's Countries of Origin and Reason to

Believe Countries of Origin list as provided by the best of its ability based on data supplied by the third-party due diligence consultants is listed in Table 7 and Table 8 of this CMR.

3.6.2 Smelters or Refiners

Microchip does not source 3TG directly from the Covered Countries, and Microchip typically does not source 3TG directly from smelters or refiners. The exceptions are gold sputter targets, gold bond wire, and tin anode. All gold sputter targets, gold bond wire, and tin anode, were purchased from smelters or refiners recognized by the RMI RMAP as Conformant with the organization's responsible minerals sourcing protocols.

Based on RCOI information provided by suppliers in Microchip's supply chains, its own due diligence efforts, and due diligence provided by its consultants, the facilities that may have processed the 3TG in Microchip's Category A products include those listed in Table 1.

4. STEPS TO BE TAKEN TO MITIGATE RISK

Microchip intends to take the following steps to improve the due diligence and further mitigate risk of using necessary 3TGs which could potentially benefit armed groups in the Covered Countries:

- a. Continue to work with the RMI and/or other relevant trade associations to define and improve best practices and build leverage over the supply chain in accordance with the OECD Guidance and/or other SEC recognized framework.
- b. Consolidate RCOI and due diligence practices and activities into a conflict minerals management system. Continue to retain third-party due diligence consultants experienced with smelter sourcing research and direct smelter engagement.
- c. Conduct bi-annual reporting year RCOI for Category A products using the RMI CMRT. Microchip will communicate its expectation that suppliers for Category A products continue working to remove uncooperative smelters and smelters that are not actively participating with the RMI RMAP, or similar sourcing programs, from the products they provide to Microchip.
- d. Conduct annual reporting year RCOI for Category B products using RMI CMRT. Microchip will communicate its expectation that suppliers for Category B products continue working to remove uncooperative smelters and smelters that are not actively participating with the RMI RMAP, or similar sourcing programs, from the products they provide to Microchip through Microchip's contract manufacturers.
- e. Continue to develop supplier engagement strategies that may improve the RCOI response rate for Category B suppliers where Microchip is a second-tier customer or lower.
- f. Through our efforts or those of our due diligence consultants, engage with selected smelters to encourage participation with the RMI RMAP responsible minerals sourcing audits.

- g. Continue to remove smelters from our Category A supply chain that become uncooperative with the RMI RMAP or who were, at one time, voluntarily participating with the RMI RMAP responsible minerals sourcing audit program or similar programs, but who have fallen off the "Conformant" smelter lists (unless the RMI places the smelter into its "smelters undergoing extended corrective action category). Microchip will review the business need for a smelter in this category and may, depending on the cause for removal and the nature and content of affirmative commitments made by the affected smelter, choose to retain the smelter in its supply chain.
- h. Engage with direct suppliers found to be supplying us with 3TG from sources that support conflict in any Covered Country to seek to establish an acceptable alternative source of 3TG.
- i. Publish a monthly due diligence report reflecting the status of our efforts to remove high-risk smelters.

TABLE 5

Category A Products

Smelters Reported to be in Supply Chain

Metal	Smelter Name	Smelter Country
Gold	Abington Reldan Metals, LLC	UNITED STATES OF AMERICA
Gold	Advanced Chemical Company	UNITED STATES OF AMERICA
Gold	Agosi AG	GERMANY
Gold	Aida Chemical Industries Co., Ltd.	JAPAN
Gold	Almalyk Mining and Metallurgical Complex (AMMC)	UZBEKISTAN
Gold	AngloGold Ashanti Corrego do Sitio Mineracao	BRAZIL

Caution Concerning Forward-Looking Statements

This Conflict Minerals Report contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include, but are not limited to, statements regarding our intentions, plans, expectations and beliefs, including statements concerning: our efforts to establish alternative sources of 3TG that do not support conflict; our plans to engage with suppliers whom we have reason to believe are supplying us with 3TG from the Covered Countries; our assessment that certain smelters may pose a risk based on their sourcing practices; our intentions to work with and educate suppliers and, where appropriate, disengage from non-cooperating component manufacturers where mitigation appears not feasible or unacceptable, and the steps we intend to take to improve our due diligence and mitigate risk, as described in this report.

We use words such as "anticipate," "believe," "plan," "expect," "intend," "may," "could," "should," "future," and similar expressions to identify forward-looking statements. These statements are based on our current expectations and assumptions and involve known and unknown risks and uncertainties that could cause actual results to differ materially from those expressed or implied in the forward-looking statements.

Factors that could cause actual results to differ materially include, among others: changes in our supply chain; our ability to obtain an adequate supply of materials from current or alternative suppliers and the cost of such materials, the level of cooperation received from suppliers with respect to our further due diligence; evolving regulations or regulatory guidance in the United States or other jurisdictions (including the Covered Countries); and changes in political or economic conditions.

For a more detailed discussion of these and other risk factors, please refer to Microchip's filings on Forms 10-K and 10-Q, which are available at <https://ir.microchip.com/sec-filings> and on the SEC's website at www.sec.gov.

Forward-looking statements speak only as of the date they are made. We undertake no obligation to update or revise any forward-looking statements to reflect events or circumstances after the date of this report, except as required by law. You should not place undue reliance on these forward-looking statements.
